2024 BUSINESS READY COMMUNITY GRANT & LOAN PROGRAM ANNUAL REPORT

The Wyoming Business Council (WBC) is from within and one of the cornerstones of the passionate about increasing resilience in our BRC program is building local community towns and communities through increased capacity. Following close interactions and detailed application scrutiny, the WBC prioritizes capacity at the local level. Capacity is both know-how and funding and one without the other investing in projects that remove barriers to becomes very ineffective at increasing resilience. growth, enable local funding and leverage The Business Ready Communities (BRC) program additional capital, and support future growth is a key initiative that reflects this passion, potential. focused on strengthening the foundations of our local economies, fostering self-reliance, and Over-reliance on a single industry, opportunity, or creating long-term prosperity across the state. investment tool makes any community vulnerable One could say BRC should stand for "Building to downturns and changes in the market. Critical **Resilient Communities.**" decision-making by our team and Board of

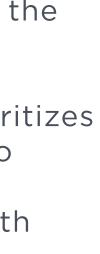

Resilience means more than just withstanding challenges; it's about adapting to them and growing stronger in the process. Through BRC, we work with local leaders to enhance economic diversity through critical infrastructure projects, investment in local industries, and new business development. The goal is to create a self-sustaining cycle that benefits all residents.

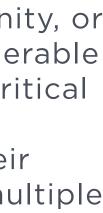

The BRC program supports communities in improving infrastructure vital for businesses to operate and grow such as roads, water and sewer systems, and community amenities. By enhancing these essential services, we ensure towns can retain and attract businesses and provide essential resources for entrepreneurs to succeed.

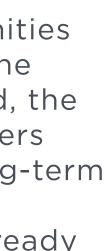

Wyoming's economic future depends on the ability of its communities to create opportunities Directors encourages towns to diversify their economies by attracting businesses from multiple sectors and pursuing all available funding mechanisms so they remain stable and prosperous, even in tough times.

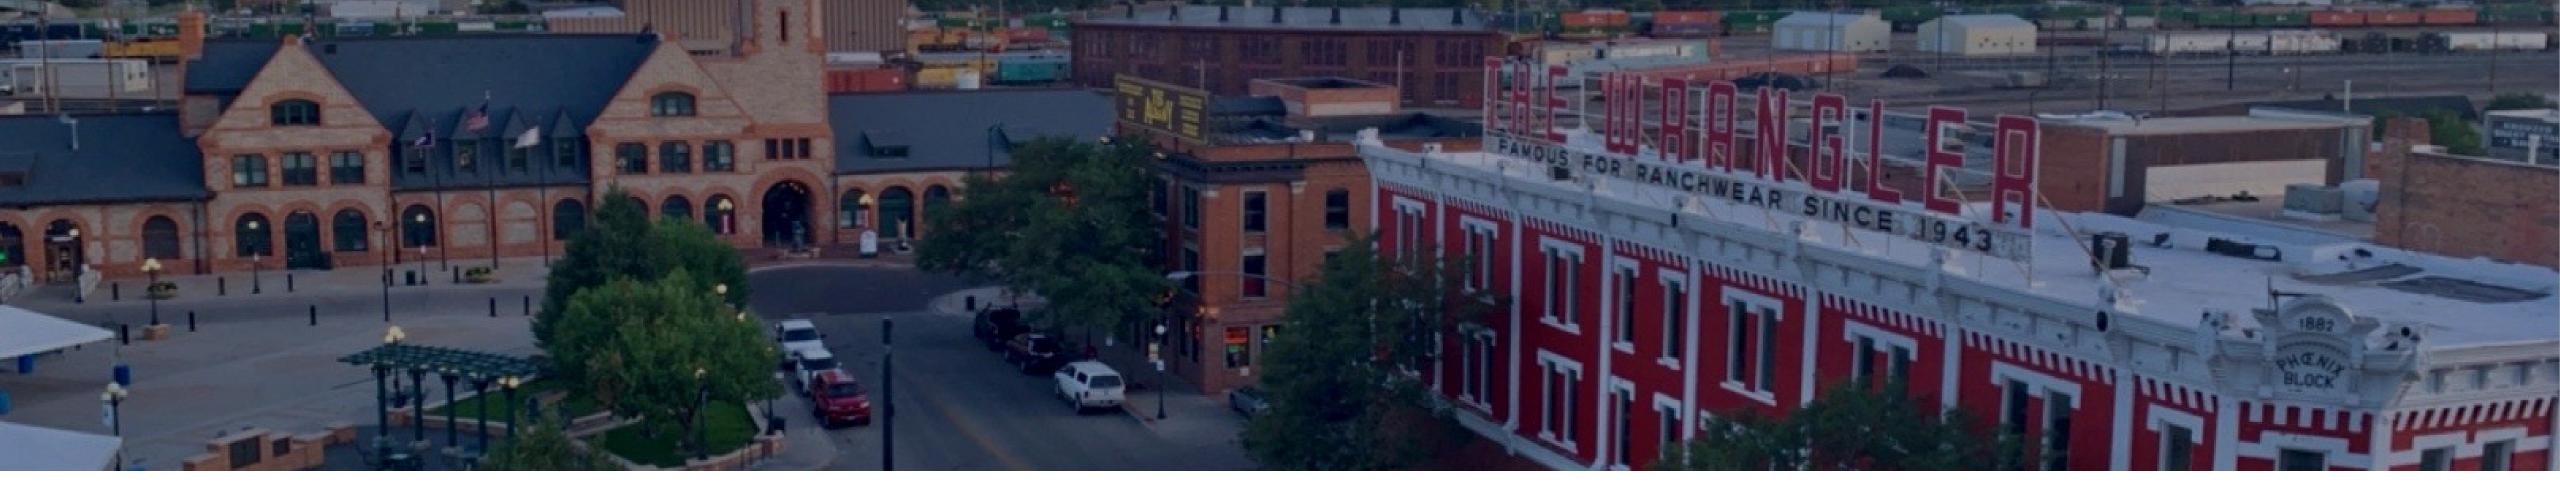

Wyoming's greatest strength is its communities and people. By equipping our towns with the tools, infrastructure, and support they need, the Business Ready Communities program fosters independence, resilience, and a path to long-term prosperity. Together, we are ensuring that Wyoming remains strong, self-reliant, and ready for the future.

HOW BRC WORKS

WHO IS ELIGIBLE:

- Cities
- Towns
- Counties
- Joint Powers Boards
- Northern Arapaho and Eastern Shoshone tribes

WHAT IS ELIGIBLE:

The BRC program provides financing for **publicly owned infrastructure and planning** that serves the needs of businesses and promotes economic development within Wyoming communities, such as:

- Water
- Sewer
- Roads
- Buildings
- Etc...

RECOMMEND

WBC Team presents the project and committee recommendation to the WBC Board of Directors in a public meeting to garner a board recommendation

FUNDING DETERMINATION

WBC Team presents the project and board recommendation to the State Loan and Investments Board (SLIB) for a final funding determination

INVESTING IN COMMUNITY INFRASTRUCTURE

Defining the Problem: All BRC applications must identify the local barrier to economic growth that the project is addressing and each application needs a clear plan or clear economic impact to be considered "complete and eligible".

07 | Wyoming Business Council: Business Ready Communities

COMMUNITY PERSPECTIVE

INVESTING IN COMMUNITY INFRASTRUCTURE

Casper Phoslock Project: The City of Casper was approved for a BRC Business Committed grant and loan package in April 2023 to purchase a building for Phoslock Environmental Technologies which had committed to relocating all their manufacturing to Casper and adding 25 jobs to the area economy. Unfortunately, due to circumstances outside the community's control, the business was unable to commit to Casper and move into the facility. However, since the BRC program is designed to ensure the community has a publicly owned asset, the City of Casper was able to use that city-owned building to attract a new tenant who is committed to the same job creation, wage figures, and reporting requirements as the original business.

This project highlights the importance of investing in community infrastructure rather than directly in a business. Regardless of who the tenant is, the community has an asset to assist in business recruitment in the future.

BUILDING CAPACITY

Capacity building involves developing core infrastructure—such as roads, water systems, and broadband—that allows businesses to operate efficiently. Effective capacity building also goes beyond physical development to ensure communities can attract, retain, and grow businesses while improving the quality of life for residents.

Workforce development and ensuring the local labor pool has the skills and education needed to meet the demands of evolving industries is essential to building resilient communities. Through collaboration with local governments, businesses, and non-profits, the BRC program fosters self-reliance by helping communities create long-term solutions tailored to their unique needs.

The ultimate goal is to empower towns and cities to create self-sustaining economies that support future growth and opportunities for future generations.

Defining Capacity: The BRC Grant & Loan Program empowers communities to build themselves.

09 | Wyoming Business Council: Business Ready Communities

COMMUNITY PERSPECTIVE

BUILDING CAPACITY

Hot Springs County: Hot Springs County initially applied for a BRC Community Readiness grant in 2022 to develop their Old Airport Property. After the initial site visit and conversations with the WBC investment and regional team, the County withdrew their application to review and incorporate recommendations from our team. BRC staff worked with the applicant on capacity building and project development, and they re-submitted their application in November 2023. The project came before the WBC Board of Directors on February 21, 2024 and was recommended and eventually approved by the State Land and Investments Board (SLIB) as requested with additional funds to complete a Feasibility Study for the property to determine the next best steps.

This project highlights how BRC projects are multi-stage, multi-step, and multi-year processes.

COMMUNITY PERSPECTIVE

SUPPORTING LOCAL BUSINESSES

Maven Outdoor Equipment Company: The City of Lander was approved for a BRC Business Committed grant and loan package in April 2021 to build a facility for Maven, an existing company that needed to expand. This project was a public-private partnership between the City of Lander, Lander Economic Development Association (LEDA), and Maven. Maven had 10 current employees and has committed to creating at least 25 new jobs over a 5-year period, with wages that are 74% higher than Fremont County's median wage. Furthermore, the company contributed \$800,000 in capital expenditures.

This project emphasizes the importance of investing in business retention and expansion (BRE) projects within our communities.

LOANS VS. GRANTS

Loans offer a sustainable approach for the BRC program by ensuring consistent returns which can be reinvested in future projects. Unlike grants, which are one-time financial injections with no repayment, loans encourage accountability and fiscal discipline from communities. Loans require a community to commit to local investment and repayment which is also a commitment to a project that can truly move the needle and create economic growth in the future.

This structure also creates a revolving fund, where repayments support additional economic development initiatives. The return on investment (ROI) is higher, as each dollar loaned can recycle through multiple projects over time, amplifying long-term community impact. Loans also foster self-reliance, encouraging recipients to develop viable business models and infrastructure. This ensures that projects funded today not only succeed but also contribute to a self-sustaining economy, generating returns that benefit the entire state well into the future.

COMMUNITY PERSPECTIVE

LOANS VS. GRANTS **Austin Engineering:** The City of Mills was approved for a BRC Business Committed grant and loan package in October 2023 to support the expansion of Austin Engineering, an existing company employing 111 people. Austin has committed to contributing \$7 million to the project in capital expenditures, as well as creating 50 additional positions.

This project highlights the effectiveness of a loan component in BRC projects.

BRC WAGES OVER TIME

BRC investments emphasize jobs and wages, plus community buy-in

- The BRC Team is scrutinizing jobs and wages to determine a project's impact
- BRC's focus as a whole is on jobs and wages. Successful projects bring that component as it is the only ladder a community can climb to get a successful project approved through the BRC channels (WBC Board + SLIB)
- The WBC helps communities build the environment for businesses to create more good jobs which then creates opportunities for people (including youth) to stay and live the life they want in Wyoming

WHERE ARE WE GOING?

Using ALL the Tools in the Toolbox

The Business Ready Communities (BRC) program emphasizes strategic investments that diversify local economies and target projects capable of "moving the needle" in economic development. To achieve this, communities are encouraged to escalate their revenue efforts through local taxes, private investments, and other funding tools, with BRC funding intended to serve as just one part of the project.

Focusing on larger, transformative projects aligns with ongoing BRC program rule revisions to increase award limits. Staff involvement and rigorous due diligence ensure projects are sound and aligned with community needs. BRC aims to increase local capacity by promoting tax revenue growth and local revenue recapture plans, ensuring a self-sustaining funding model that maximizes long-term impact.

LEADING ECONOMIC GROWTH BUILDING RESILIENT COMMUNITIES CREATING OPPORTUNITIES TO THRIVE

Through leadership, policy, and investments, the Wyoming Business Council stands firmly upon Wyoming's heritage while advancing innovation, business creation, recruitment, and growth to build resilient communities and create opportunities to thrive.
